

# GLOBAL FUELS

Operating in physical energy markets since 2018

Your Trusted Partner in Energy Trading & Supply

Quality • Flexibility • Continuity

# WHO WE ARE

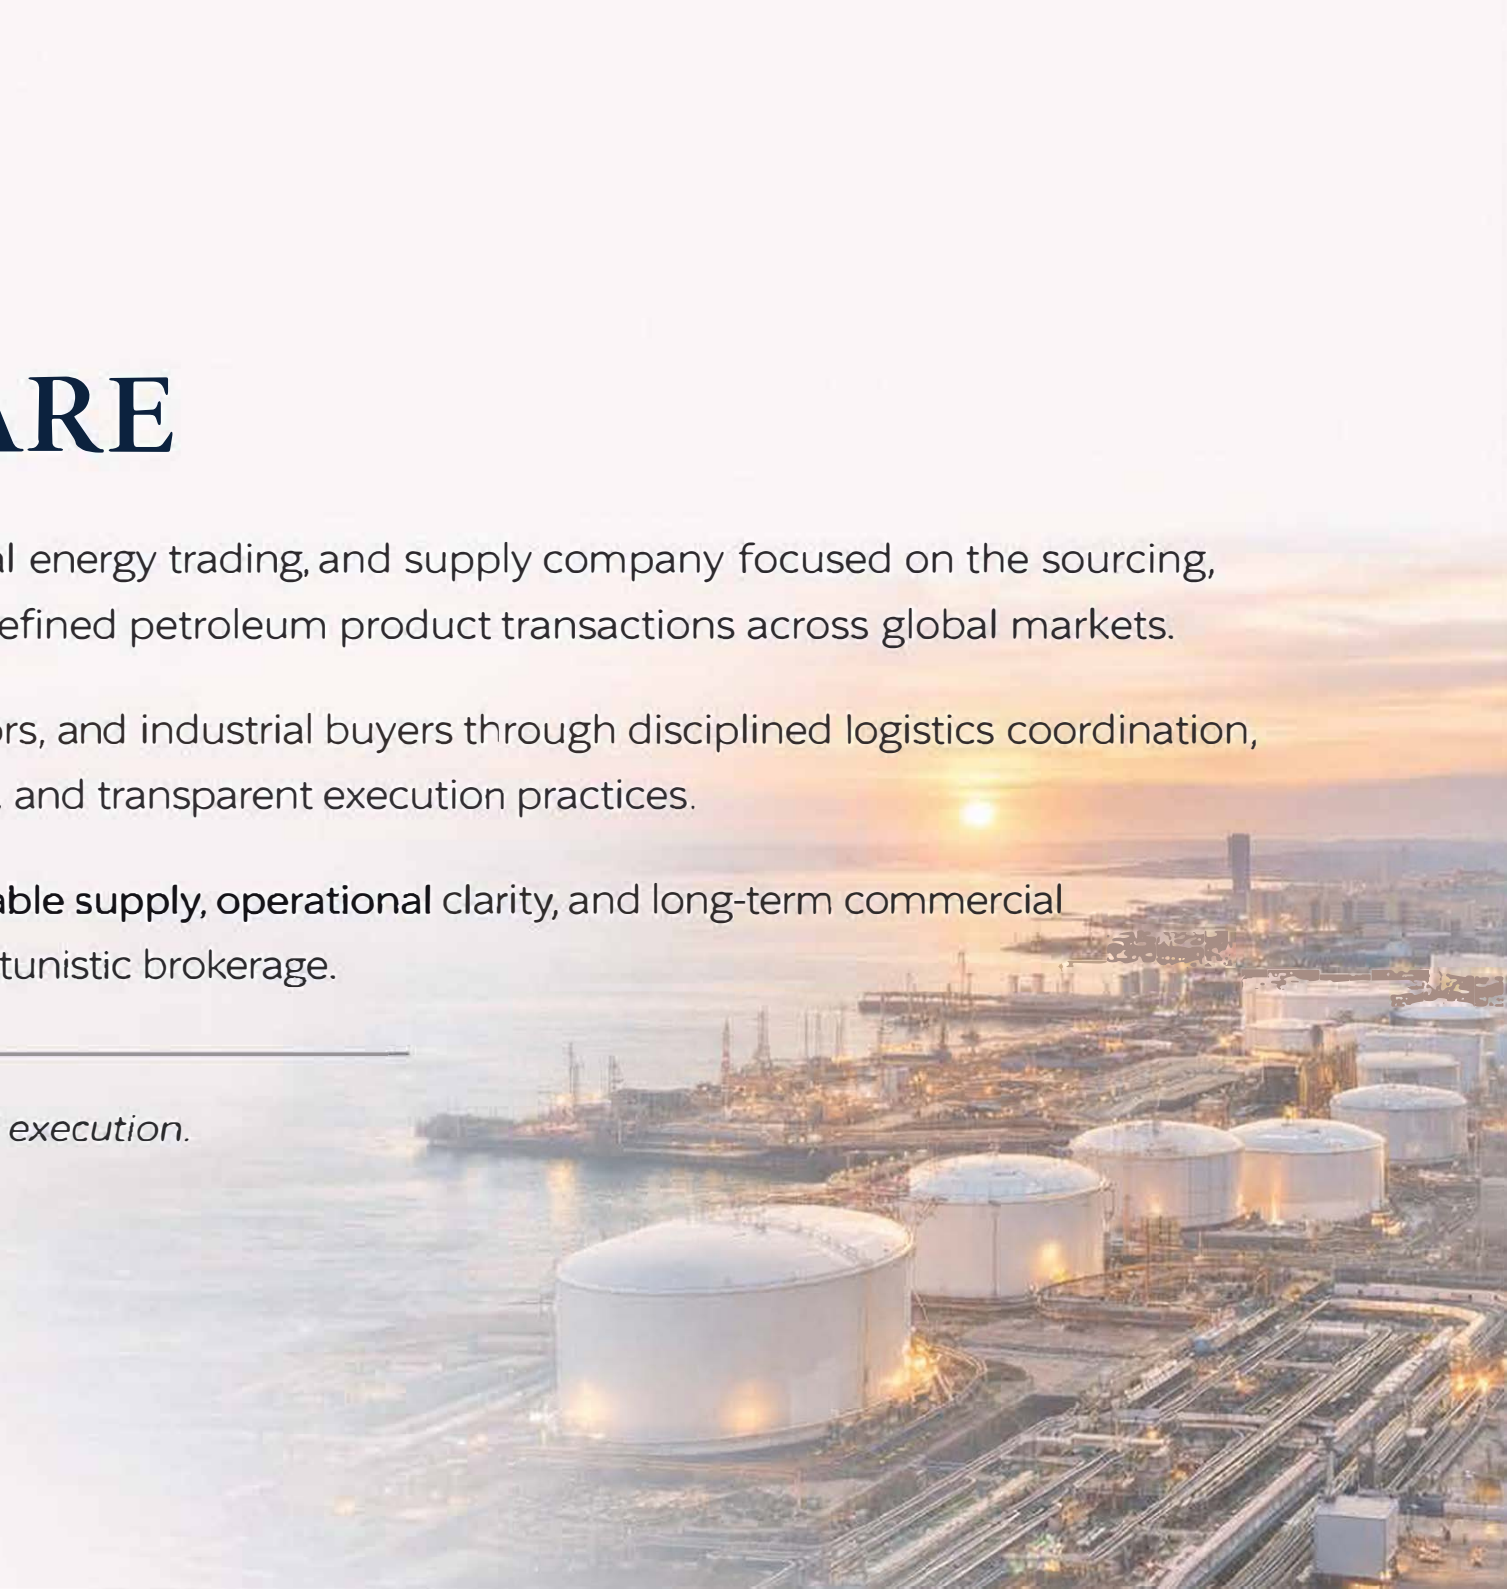

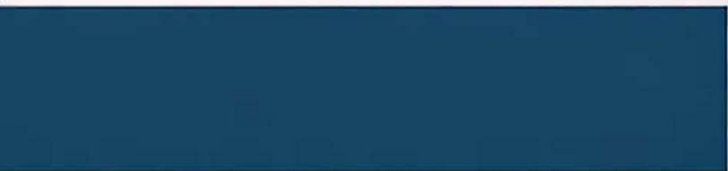

Global Fuels is an international energy trading, and supply company focused on the sourcing, structuring, and execution of refined petroleum product transactions across global markets.

We connect refiners, distributors, and industrial buyers through disciplined logistics coordination, structured contracting models, and transparent execution practices.

Our approach emphasizes **reliable supply, operational clarity**, and long-term commercial partnerships rather than opportunistic brokerage.

*Structured energy supply. Global execution.*

# What We Do

Integrated sourcing, trading, logistics, and delivery of refined petroleum products.

Global Fuels participates in the physical energy markets as a structuring and execution partner, aligning producers and industrial buyers through disciplined transaction design, logistics coordination, and transparent commercial frameworks:

## 1 Product Sourcing

We secure refined petroleum products directly from refineries and established producers across Asia, the Middle East, and Europe.

## 2 Structured Transactions

We structure contracts, pricing mechanisms, and delivery schedules aligned with buyer operational needs and financial frameworks.

## 3 Logistics & Shipping Execution

We coordinate vessel chartering, terminal access, storage arrangements, and discharge planning to ensure smooth delivery.

From refinery gate to buyer tank — executed with discipline and transparency.

# Products Traded

High-quality refined petroleum products we source and deliver

Global Fuels sources and delivers refined petroleum products that meet international specifications and quality standards. Supported by strong supply relationships, logistics expertise, and reliable execution.
